

FOR SALE - 1954 Hudson Hornet 4 Door Sedan

This car was purchased in Arizona, and moved to Texas. It is equipped with Twin H, Power Steering and Brakes as well as Air conditioning and electric windshield wipers. An aluminum replacement radiator has been installed. The pictures clearly tell the viewer that the previous owners attempt to repaint the car has failed and that the interior although original and mostly in usable condition will also require attention. This car is licensed and is a running, driving vehicle. Recently the car was taken to a local shop for a full check out and tune up. On the drive home from the shop, the owner was impressed with the performance and comfort the car provides. The car is being sold as is where is at Houston Texas. The buyer will be responsible for all costs associated with shipping this vehicle after purchase. For price and further information, contact the owner via email: sam.petner@gmail.com.
