

Hudson Stepdown Accessory Visor Kit Pieces

All pieces removed from the Hudson Packing

The drip rail mounting brackets on Hudson Karvisor kits include a stainless steel mounts which fasten to the drip rail. The original mounts were too short to be properly securing a visor to convertible and hardtop vehicles. To overcome this situation the vendor for the KarVisor kits created a "convertible/hardtop version which was had a longer reach and assured the visor would remain fitted. This version is also used on Hudsons with stainless moldings around the roof lines. These longer reach mounts are very difficult to find. So the following modification can be made to the original "short" brackets to make them into "long" reach versions.
